

Pre - Sorting - Bin

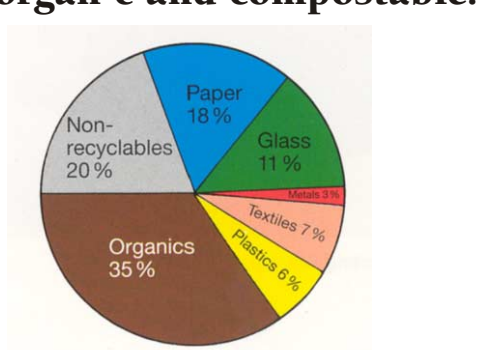

The Pre-Sorting-Bin of 9.4 liter is to be used in private households, kitchen, office or industrial facilities. Its small size and practical design make it particularly well-suited for kitchen use.

The Pre-Sorting-Bin may be used singly or in multiples. Various colours for sorting recycable and non-recycable materials are available.

The steel bow handle and the additional rear handle make the handling of the Pre-Sorting-Bin easy to empty the container.

Whether these kitchen scraps are composted at home or in a central composting plant, the quality of the compost will depend on successful and responsible sorting at the original source.

It is beneficial for all of us to sort all elements at the point of generation to ensure high levels of recycling.

Various colours for sorting recyclables.

Placed under the sink unit.

Mounted on furniture's door

Paper

Glass/Metal

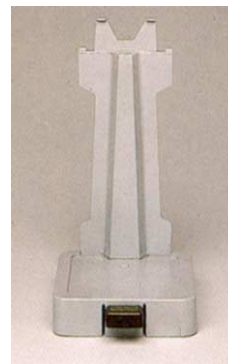

Kitchen Waste

Easy to handle: The lid of the Pre-Sorting-Bin can be fixed by the steel bow handle under the lid front or by fixing the rear-handle. That makes emptying the bin easy and clean.

Bathroom

Pedestal for foot pedal opening

Non-Recyclables
